

With nearly 2 million ethics applications having been successfully processed through our systems worldwide, Infonetica is the leading global provider of intuitive ethics management software. Used daily at organisations such as Monash University, Cranfield University and King's College London, ERM seamlessly meets their ever changing needs by streamlining the process within ethical compliance whilst delivering significant gains not only to applicants, administrators and committee members, but the organisation as a whole.

Administrators can manage the whole process

- We always listen and deliver a flexible, future-proofed software solution that is configured to meet your specific ethical and compliance needs today
- Our system gives significant processing and productivity benefits to all members of your committee, increasing through-put of applications and reducing the burden of administration time and cost

We simplify your entire ethics management process

- User-friendly, flexible workflow with customisable form builder
 - Accessible from web browser, tablet or mobile phone
- Intuitive user interface means reviewers need minimal training
 - Simple dashboard with real-time reporting gives a quick view of the application lifecycle progress
 - Management of user defined roles with relevant permissions
 - Automated communications, creation of letters, emails and alerts
 - Real-time reporting
 - Online meeting management
- Full support - data migration, training, online assistance, and data back-up

Everyone benefits from implementing ERM

- ERM is quick to implement
- Improves time from application submission to approval
- Allows you to meet governance and compliance regulations
- Live and historical application reporting
- Securely hosted system with disaster recovery
- Software as a service (SaaS)
- Regular updates, maintenance fixes and 24 hour availability
- Customisable solution that grows and changes with your needs

Whether large or small, we deploy from department level to organisation wide systems, single-site to multiple sites, nationally and internationally.

“ Committee members needed minimal training and even senior, non-computer literate staff found it simple to use. Academic staff needed no training at all - the true test of success! Researchers tell us they wish all systems were this easy to use. ”

Dr Simon Barrett, Research Ethics & Compliance Manager, Monash
