

ReDA is a flexible, secure and reliable web-based research management system.

Track targets - Create reports

- Designed to satisfy the UK information gathering and reporting requirements. Facilitates PID and HLO reporting
- Reports can be generated from any system data using ReDA's powerful report building tools

Compliance - Governance

- Customisable system allows ongoing compliance
- Track key HRA dates
- Audit trail shows all changes

Access online - One centralised system

- Easy online access from any web browser on any device
- Centralised information means all studies accessible from one system. Share information across your organisation
- Activity and recruitment tracking can be monitored against government targets

Financial tracking - Cost minimising

- Track study costs and ensure timely cost recovery
- Improve study timelines through automated alerts
- Import and Export data from multiple systems

ReDA is currently used worldwide for the ongoing management and administration of over 100,000 active research studies, implemented across hundreds of organisations from individual hospitals, universities and to national networks.

Supports Compliance with MHRA NIHR as well as internal NHS Trust Guidelines

**Book a demo now: call 0208 334 6900
or email reda@infonetica.net**

Standardised reporting templates save administrators time and give real-time information to research management. Quarterly report running only takes 5 minutes now.
